Baeza

The largest specialist
in sustainable solutions
in the water sector

Discover the secret of wellness

At Baeza we understand the world of wellness as an essential need of our customers, therefore we not only work with the best brands, we also manufacture, install and prepare our products taking care of the finer details to ensure they are tailor made to fulfil each customer's wishes.

As a spa & wellness professional, you know that you can trust Baeza, as if it were your own company.

You will find all the solutions for your saunas here.

Your Sauna designed to your taste **You imagine it, we'll create it.**

A specific space, a variety of needs, each customer knows what they want, how they want it and at Baeza we turn their wish into a reality.

We make our engineering and design department available to you to help with materials and technology, and also to adapt the sauna to any specific needs.

Our design team and artisan carpenters will help in the development of the planning and assembly of your project.

Control panels for all of the Sauna's parameters

Control panel **ELITE HELO**

Access the cloud and control your sauna with the Elite Free multi-multiparametric control panel, for saunas and steam rooms, packed with advanced features. They can be programmed individually according to your timetable.

ADD FUNCTIONS

Auxiliary fans, fragrance pumps or lights: the Elite Free control panel handles it all clearly and precisely.

4.5' TOUCH SCREEN

It shows the real-time status of all aspects of your sauna and steam room. It includes energy saving features.

PURE TOUCH PANEL

Set up and control your sauna with the Helo Pure control panel. It allows you to control the lighting, temperature and sauna times easily with just a few taps of the backlit screen.

OT 2 PLE III PANEL

Easy to operate with a pre-set time and temperature function.

WE 40 - 50 RELAY BOX

The relay box is developed for seamless operation between the Pure or Elite control panels and sauna heaters of up to 15 kW. We recommend that you place it outside the sauna.

Italian design accessories

Inspired by the waves of water.

Provided in a silver-grey finish. It features sandblasted, anodised aluminium for a quality finish. The bucket handle is in light birch, reinforced with poplar for added strength. In addition to its sleek design, the bucket has a smart functional spout to enable more precise pouring of the water, ideal for filling the water tank of Helo heaters.
